

Invented for life

ORIGIFY

Invisible. Traceable. Secure.

Bosch introduces its revolutionary invention towards
Traceability and **Brand Protection**.

ORIGIFY
stay original. stay verified.

Welcome to Origify!

Origify can securely protect your products via an **optical recognition system** that uses the product's natural surface and keeps its design intact. This **advanced technology simplifies the verification process** by providing **real-time, on-site authentication** through your smartphone.

You can personally experience our latest technology using the provided cards.

Here is a step-by-step guide:

1. Download the **"Verify Origify"** app onto your smartphone
2. Choose the **Card Origify** (Paper Brand)
3. Follow the App instructions for verification

Registered cards feature a unique number on their reverse side, establishing traceability at the individual unit level.

Unregistered cards lack a number ("XXXX") and are highlighted by a red border.

Upon scanning, a result labeled **"Authentic"** indicates previous registration by RB GmbH. By scrolling down, you can access the distinctive custom ID. For further guidance, please consult the app store description.

To find out more about our technology, visit www.bosch-origify.com and connect with us on LinkedIn.

**Best,
Team Origify**
